WORK EXPERIENCE

AdsGency AI

Jun 2026 - Sep 2026

Software Engineer Intern

San Francisco, CA

- Built a Redis-backed idempotency framework across 8 ad platforms that eliminated duplicate ad generation and double-charging on retries, using a SET NX claim/replay contract with fail-open design.
- Engineered an AI image suggestion pipeline using GPT-4o-mini scoring and an SSRF-hardened S3 import API, cutting manual creative upload time by surfacing ranked brand images directly in Meta and TikTok media upload flows.
- Shipped Snapchat carousel ad type end-to-end across 3 repos, enabling a new ad format for advertisers and expanding platform ad inventory alongside existing image and video types.
- Resolved campaign analytics failures across 4 platforms (TikTok, Snapchat, Reddit, Pinterest), fixing access-token injection and ad-account loading bugs that restored accurate reporting for all affected advertisers.
- Implemented DevSecOps pipeline across 3 repos with Bandit SAST blocking, Dependabot scanning, and Gitleaks detection, shifting vulnerability discovery left and reducing security review overhead.

ConnectedH

Jan 2022 - Dec 2023

Software Engineer

Gurgaon, India

- Owned full-stack development of a healthcare affiliate platform (Node.js, TypeScript, React), architecting reusable API contracts and frontend components that accelerated partner onboarding and drove a 20% engagement uplift.
- Developed a live chat solution integrated with Zoho CRM (India's leading enterprise CRM) using React, Node.js, TypeScript and WebSockets, streamlining appointment coordination and eliminating critical scheduling bottlenecks.
- Automated data lifecycle management on AWS S3 by implementing tiered storage and retention policies using Python (Boto3) scripts which reduced monthly cloud expenditure by 10% and ensured compliance.

IBM

Dec 2019 - Sep 2021

Associate Systems Engineer

Bangalore, India

- Executed CI/CD infrastructure for 10+ microservices, embedding SAST/DAST security gates into automated Jenkins pipelines that cut deployment cycle time by 10% and shifted vulnerability detection left by an average of 3 pipeline stages.
- Managed Kubernetes infrastructure using Python and Bash scripts to automate manifest configurations while implementing Azure Blob Storage lifecycle policies to ensure secure and consistent non-prod releases.
- Maintained 99.9% production uptime across distributed Kubernetes clusters by engineering automated self-healing configurations and alert systems that resolved pod failures before user impact, eliminating reactive incident response for recurring failure classes.

PROJECTS

Kanban Board

Apr 2026

- Created a full-stack Kanban board using React 19, TypeScript, and Supabase, delivering 15 plus features including multi-dimensional filtering, and real-time activity logging across 6 normalized PostgreSQL tables with Row Level Security policies.

CodeVoyage

Feb 2026

- Built an agentic AI platform on Subconscious, orchestrating 5+ autonomous agents that leverage Exa Search for neural repository crawls across TypeScript/Node.js codebases, reducing context retrieval latency by 40% through token-efficient pipelines.

DocuChat AI

Nov 2025

- Designed a production RAG pipeline (LangChain, OpenAI, Pinecone) with precision-optimized chunking and sliding-window context retention, delivering sub-2s multi-turn reasoning across 100+ page documents at tens of thousands of queries

Flashcard Study App

Oct 2025

- Shipped interactive study app with React and Node.js featuring deck management, timed quiz mode with live scoring, and cookie-based session authentication.

TECHNICAL SKILLS

- **AI/LLMs**: RAG, OpenAI API, LangChain, Agentic AI, Multi-agent Systems, Prompt Engineering, Claude API, LangGraph
- **Frontend**: TypeScript, React, JavaScript, Vue.js, Redux, Next.js, HTML/CSS
- **Backend & APIs**: Python, Java, Spring, Flask, Node.js, Express, Kafka, FastAPI, Go, C++, Restful API
- **Databases & Caching**: MongoDB, MySQL, Redis, PostgreSQL, Pinecone (Vector DB), Firebase
- **Cloud & DevOps**: Terraform, Docker, Kubernetes, Jenkins, Git, AWS, Linux, GitOps
- **Monitoring** : Prometheus, Grafana, CloudWatch, Splunk, Posthog

EDUCATION

Northeastern University

Jan 2024 - Dec 2025

Master of Science, Computer Science

Boston, MA
